SECTION 01

# What changed this quarter

Revenue grew across every region, with the strongest movement in the mid-market segment. Retention improved after the onboarding rewrite, and support volume fell for the third quarter in a row.

**+18.4%**
Revenue

**92.1%**
Retention

**-27%**
Support load

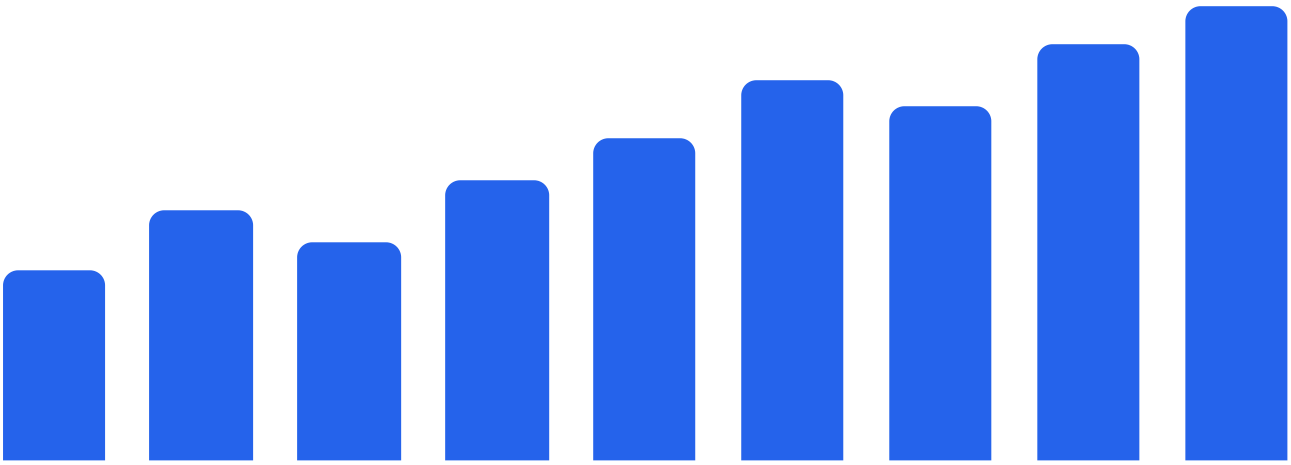

## Regional split

| REGION | REVENUE | CHANGE |
|---|---|---|
| North America | $4.2M | +21% |
| Europe | $3.1M | +14% |
| Asia Pacific | $2.4M | +26% |
| Rest of world | $0.9M | +9% |

SECTION 02

# Pipeline by month

Monthly bookings, indexed against January. The dip in April is seasonal and recovered fully by June.

Bookings are tracked weekly and reconciled against finance at month end. The chart is pure CSS so the fixture stays small.

SECTION 03

# Next quarter

Three priorities: finish the migration, tighten the onboarding funnel, and ship the reporting API. Each has an owner and a date; none requires new headcount.

| PRIORITY | OWNER | DUE |
|---|---|---|
| Migration | Platform | Week 4 |
| Onboarding funnel | Growth | Week 6 |
| Reporting API | Data | Week 9 |

---

Prepared for the fixture suite. Any resemblance to a real company is accidental.
